North Region Campaign Review

Spring Refresh | Evaluation period: 5 May?1 June 2025 | Prepared 10 June 2025

Executive summary

This fictional test report summarizes campaign performance and operational observations for the North region. Net revenue reached $428,600, gross margin was 34.2%, and the campaign exceeded its revenue target by 7.2%. The figures below are synthetic and intended for chatbot testing.

Decision: continue the Citrus Sparkle bundle in high-availability stores, while reducing paid placement for the slower Berry Mix offer until distribution improves.

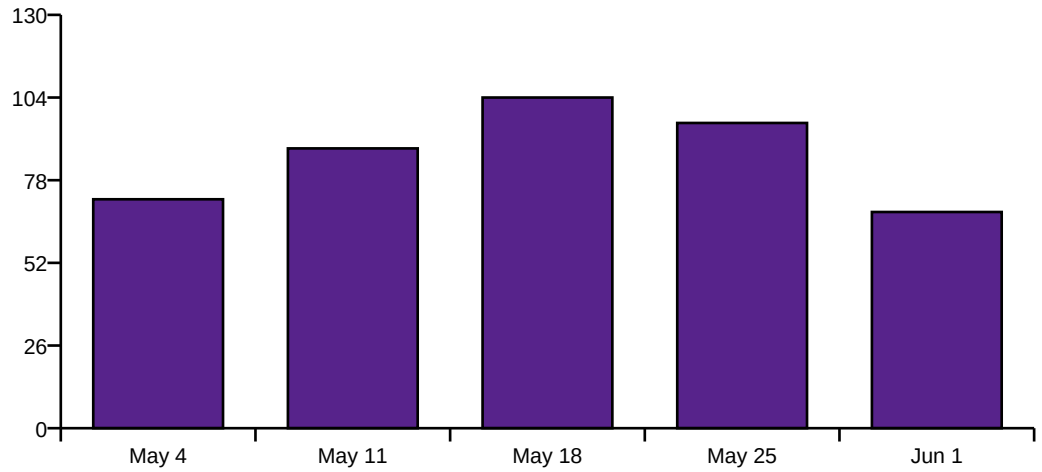
Key measures

Measure	Actual	Target	Variance
Net revenue	$428,600	$400,000	+7.2%
Gross margin	34.2%	33.0%	+1.2 pts
Units sold	18,240	17,000	+7.3%
Store availability	91.4%	95.0%	?3.6 pts

Revenue performance

Weekly net revenue rose during the launch and peaked in the week ending 25 May. The final week softened after paid media ended, while remaining above the pre-campaign baseline.

Weekly net revenue ($ thousands)



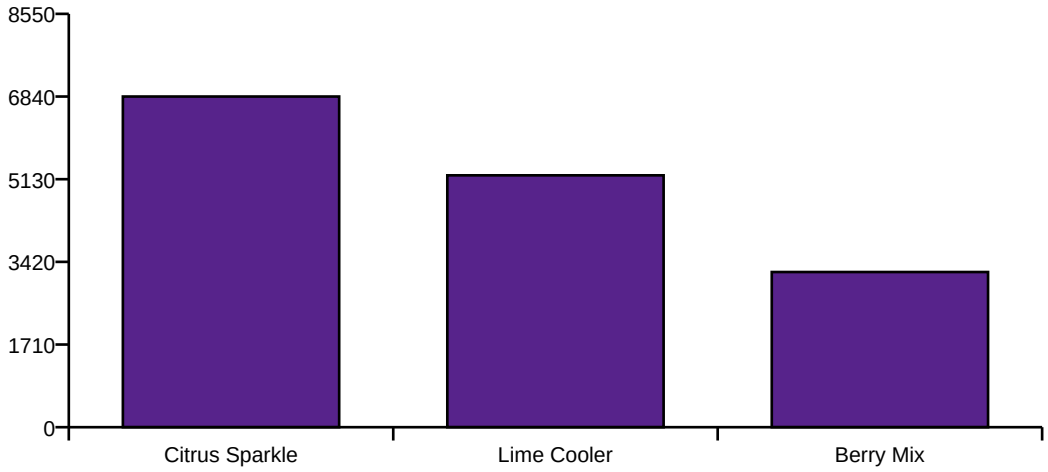
Regional split

Region	Net revenue	Gross margin	Availability
North	$428,600	34.2%	91.4%
South	$391,200	31.8%	88.7%
Central	$276,900	35.1%	94.2%
West	$318,400	33.6%	92.1%

Product and channel findings

Citrus Sparkle generated the strongest response, with 6,840 units sold and 38.1% gross margin. Berry Mix sold 3,210 units; stock availability in participating stores averaged 84.6%. Digital coupons accounted for 29% of tracked campaign orders.

Units sold by featured product



Customer themes

Positive: shoppers mentioned multipack value and citrus flavor. Friction: stores reported empty end-cap displays on weekends. This qualitative summary is fictional and included to test document-grounded answers.

Recommended actions

Priority	Action	Owner	Due
High	Restore weekend end-cap stock at 24 low-availability stores	Field sales	14 Jun
Medium	Shift 10% of Berry Mix placement to Citrus Sparkle	Category lead	21 Jun
Medium	Keep digital coupon active for one additional week	Marketing	18 Jun

Method and source notes

Campaign outcomes combine fictional point-of-sale totals, retailer availability snapshots, and campaign-period summaries. Net revenue is after discounts and returns. Gross margin is net revenue less estimated cost of goods, divided by net revenue. Availability is the share of reporting store-days with featured products in stock.

Limitations

The report uses synthetic data. Small retailers reporting fewer than four days per week were excluded from availability. Attribution is descriptive and does not establish that the campaign alone caused observed sales changes. Values should not be treated as operational facts.

Test questions

? What were North campaign net revenue and gross margin? ? Which featured product sold the most units? ? Compare North campaign revenue with CPG data and state which source is more current. ? What availability action was assigned to Field sales?
