South DC Beverage Availability Update

Reporting week: May 12 - May 18, 2025 | Distribution center: South DC | Unit: cases

Availability summary

Beverage fill rate at South DC was 88% for the reporting week, below the 96% operating target. Sparkling Water Lime 12-pack had the largest service gap. An inbound shipment arrived three days later than planned.

Inventory and service facts

Measure	Observed	Reference
Weekly fill rate	88%	Target: 96%
Lime 12-pack on hand	410 cases	At start of May 18
Forecast weekly demand	620 cases	South DC
Late inbound receipt	800 cases	Received May 20; 3 days late

Recovery update

After the May 20 receipt, order fill rate recovered to 94% by May 25. The remaining gap was associated with two stores that had not received their scheduled replenishment. The supply planner should confirm store delivery windows and review the carrier appointment process.
